

LABC Drill Site Permit Stipulations

1. A sign will be displayed at the gate stating the well number, the name and number of the operator, the emergency 911 number, and the telephone numbers of two contacts.
2. On-site noise monitors established the ambient noise level at 55 dBA. During drilling, the allowable nighttime sound level is 58 dBA and the allowable daytime sound level is 60 dBA. Fracing operations shall not exceed 62 dBA.
3. All noise levels shall be measured at the well setback distance. Due to the proximity of protected uses, the exterior noise shall be continuously monitored in one-minute intervals and forwarded to the City daily.
4. The approved water site plan limits the water withdrawal rate to a maximum of 800 gallons per minute.
5. The transportation route commences at Interstate 20 Highway (I-20). From I-20, travel northbound on West Green Oaks Boulevard, east on West Mayfield Road and then north on Little Road to the site access road on the left. The access road will be constructed of concrete paving from Little Road to the entrance of the drill site. Reverse the directions to exit the site back to I-20.
6. Prior to the commencement of any drilling activity, street trees must be installed within the 10-foot landscape setback along Little Road.
7. The existing trees on the site shall also remain, as illustrated on the landscape plan.
8. Two additional street trees must be planted along the portion of Jewell Road that is not currently screened by the existing tree mass.
9. The existing brick and wrought iron fence along the perimeter of the site shall remain. The drill site, however, must be surrounded by a six-foot black vinyl-coated chain link fence.
10. The access road must be constructed of concrete paving from Little Road to the entrance of the drill site.
11. Pipeline routing information shall be provided to the City once the route is identified.
